

Проектно-исследовательская работа по английскому языку

«Лох-несское чудовище»

Сегодня перед нами стоит интересная задача: изучение гипотезы о существовании Лох-Несского чудовища.

Наша цель: определить, существование монстра – это правда или же вымысел? И где же его искать?

Чтобы ответить на эти вопросы, мы поставили перед собой следующие задачи:

1. Изучить литературу и исследовать новейшую информацию Интернет-сайтов
2. Узнать, когда впервые появилось упоминание о Лох-Несском чудовище
3. Провести исследование среди 6-7 классов для выявления их знаний о загадочном существе (результаты на экране)
4. Нарисовать рисунки на тему «Как я представляю себе Лох-Несское чудовище»

Вашему вниманию мы представляем проект, посвящённый теме «Лох-несское чудовище». Над проектом работали ученицы 7-б и 10 классов: Бексейтова Галина, Пермякова Екатерина, Энгельман Кирена, Буткан Дарья, Колесникова Полина, Кузнецова Марьяна, Рязанцева Полина

Scotland is in the north part of Great Britain with the capital of Edinburg.

It is a country of mountains and plains.

The famous poet Robert Burns liked Scotland very much and dedicated his poem to this place:

My hearts in the Highland, my heart is not here;

My hearts in the Highland, a chasing the deer;

A chasing the wild deer and following the roe;

My heart in the Highland, wherever I go.

Of course, Scotland is full of secrets and mysteries.

One of the most mystical and famous places is Loch Ness Lake.

Loch- Ness Lake is the second largest in the area among the lakes of Scotland.

The area of lake is 65 square kilometers.

The lake appeared about 300 million years ago and has a glacial origin.

Loch- Ness Lake is surrounded on all sides by mountains.

The waters of the lake are dark and cloudy and contain many secrets...

The official existence of a certain creature in the lake was announced in 1933.

Every year the famous monster attracts many tourists to the Loch- Ness Lake .

It's said, that the monster most often appears near the castle of Urigart.

Eyewitnesses described the mythological animal as a creature with a small head, a long neck and a thick massive trunk and called it Nessie.

Scientists tried to find the monster with explosions, but it didn't help.

Then they placed cameras under water, that took pictures every few minutes, and it cannot help.

In 2003 the BBC sponsored a full search of the Loch Ness using 600 separate sonar beams and satellite tracking.

No animal of any substantial size was found whatsoever and despite high hopes, the scientists involved in the expedition admitted that this essentially proved the Loch -Ness monster was a only a myth.

We have deceived a sociological interrogatory among pupils of 6-7 forms and found out that the majority didn't know about Loch-Ness Monster and didn't believe in its existence.

Thanks to its mystery, Loch Ness Lake is visited by a lot of tourists.

People come to the lake in the hope of seeing a mysterious inhabitant.

Loch- Ness monster is known all over the world.

Many people believe in the existence of a monster, others believe, that this is a foolish invention of lovers of mysticism and fantasy.

We have not found evidence that the Loch- Ness monster exists, but want to believe in the opposite.

As for me, I believe, that the Loch- Ness monster exists.
